EYE HEALTH SCREENING TESTS

Please Read and a Technician Will Speak To You Further

At Now Eye See Family Eye Care, we pride ourselves in offering advanced eye care technology to our patients and providing the best possible standard of care. Because of this, we recommend two screening tests at your annual eye examination. These tests are not covered by insurance plans because they are preventative in nature, but we keep the price as low as possible.

Digital Retinal Photos **\$29.00**

This procedure consists of taking a digital photograph of the back part (retina) of your eye and allows instant viewing of the optic nerve, macula, blood vessels, and tissue inside of the eye. This is not an X-ray or an ultrasound procedure, and nothing will touch your eye. *You will actually see the images of your eye on a computer monitor.* The retinal photos become a permanent part of your medical record and are very valuable in assessing the health of your eye presently, and safeguarding the health of your eye for the future.

Visual Field Analysis **\$15.00**

This highly sophisticated computerized instrument enables the doctor to determine if there is any disease on the front surface of the eye, inside the eye, or behind the eye (all the way back to the brain). We recommend that this test be done every year because the conditions we are looking for can develop at any age or at any time. Some of the conditions that this instrument can detect include glaucoma, macular degeneration, and brain tumors. This instrument also enables the doctor to better diagnose the cause of headaches and can detect glaucoma up to four years earlier than if this test was not performed. We recommend that **all** patients have this test performed, and you should strongly consider having this test if:

- you or a blood relative has glaucoma
- you or a blood relative has macular degeneration
- you have headaches
- you have unexplained vision loss
- you want a fully comprehensive eye exam using the latest technology

Combination Value **Save \$5.00** The usual fee is \$44.00 – Get Both for **\$39.00**

I do not wish to have any screening tests.
